Published: **December 2015**

IMPORTANT NOTICE

Purpose

AEMO has prepared this document to provide information about WEMS 3.13.1 (Build 981-6) release, as at the date of publication.

Disclaimer

This document or the information in it may be subsequently updated or amended. This document does not constitute legal or business advice, and should not be relied on as a substitute for obtaining detailed advice about the Wholesale Electricity Market Rules (30 November 2015), or any other applicable laws, procedures or policies. AEMO has made every effort to ensure the quality of the information in this document but cannot guarantee its accuracy or completeness.

Accordingly, to the maximum extent permitted by law, AEMO and its officers, employees and consultants involved in the preparation of this document:

- make no representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of the information in this document; and

- are not liable (whether by reason of negligence or otherwise) for any statements or representations in this document, or any omissions from it, or for any use or reliance on the information in it.

VERSION RELEASE HISTORY

Version	Effective Date	Summary of Changes
1.0	8/12/2015	Document Creation

DOCUMENT APPROVAL

Name and Position	Date
Martin Maticka Group Manager, Operations and Technology (WA)	10/12/2015

CONTENTS

1. INTRODUCTION

These are the release notes for WEMS 3.13.1 (Build 981-6). This release addresses important issues described in section 2 below.

2.   RESOLVED ISSUES

	Reference	Summary	Problem
🟡	WEMS-6186	Automated emails generated during the single association transfer change request workflow is being sent from the invalid email address.	Emails generated by the single association transfer change request are being sent from associationtransfer@WEMS which does not exist. This fix ensures emails will be sent from noreply@aemo.com.au.
🟢	WEMS-6185	The System Management incoming/outgoing file processing is unable to handle disruptions to its workflow.	Disruptions have caused file incoming/outgoing file processing to stall in certain circumstances. Changes have been made to this process to ensure greater resilience to disruptions.
🟢	WEMS-6153 and WEMS-6052	In the AEMO internal Reserve Capacity Test tool, the test cycle end dates are displayed incorrectly.	The Reserve Capacity test cycle end dates are prepopulated with the delivery date instead of the trading date which trigger validation errors. This fix ensures that the end date is prepopulated correctly.

Status	
🟢	Internal changes
🟡	Minimal or no impact to Market Participants
🔴	Needs attention. Potentially requires system or operational procedure changes

MEASURES AND ABBREVIATIONS

Abbreviations

Abbreviation	Expanded name
AEMO	Australian Energy Market Operator
WEMS	Wholesale Electricity Market System

GLOSSARY

Term	Definition
Delivery date	The calendar date associated with a Trading Interval.
Trading date	The date associated with a trading day, being the 24 hour period commencing at 8:00am Western Standard Time.
